Sampling and Monitoring Course

GESTI has developed a special course called Sampling & Monitoring Procedures. This course meets the criteria for Level 1A and Level 1B continuing education for the Georgia Soil & Water Conservation Commission and is approved for 4 Hours of instruction for Re-Certification. Individuals may choose to count these credit hours towards their Level 1A or Level 1B certification.

Course topics include: Sampling Methods, Identifying Sample Points, Proper use of Turbidimeters, How to Prepare & Measure Samples, Direct Read Sampling, Laboratory Sampling, Reading Topo Maps, Record Keeping & Reporting Requirements.

Great course for Inspectors, Monitoring Consultants and anyone responsible for monitoring turbidity levels in receiving streams and outfalls on land disturbing activities.
